## Technical Skills:

### Programming:

Python  
Html, CSS, JavaScript  
PHP, Java  
GDScript(Godot)  
Laravel, codeigniter4  
Tailwind,Bootstrap  
Github & Git  
Version Staging  
Cpanel  
C++,VB.NET

### Data Management:

SQL ( Data Query, Joins)  
Json,Csv  
NoSQL(FireBase)

### Game & Creative Dev:

Godot Engine  
Blender, BlockBench  
Sprite and Tile Sheet Designs  
Unity  
Aesprite

### Computer Literacy:

Word, Excel, Presentation,  
Access  
Canva  
Trello  
Command prompt(penguin,  
cmd, crosh)

### Ai & Automation Tools:

Ai prompt engineering(Aim  
method)  
Co-Pilot, Gemini, Claude,  
ChatGpt, Perplexity  
Mixamo

## Objective:

I am eager to join a collaborative tech team that offers a strong culture of learning, mentorship, and continuous improvement. I aim to contribute my foundational web development knowledge to real-world projects while actively growing through the guidance of my team.

## Education:

**Bachelor of Science In Information Technology**  
*Cavite State University, Cavite City Campus*  
**( 2022 - 2026)**

## Experience:

**StartupLab Buisness Center & AI Consulting**  
**Agency OPC**  
*Web Developer intern*  
**( February 2026- March 2026)**

## Technical Projects:

### Job Portal

Co-Developed a job portal website that featured three user level applicant,employer,and admin. It was coded with html, Js, tailwind, PHP and Laravel and hosted on Cpanel along with git and github for the local testing and environment.

### Python Game:

Developed a "Space Invaders" inspired 2D game that featured obstacle and reward mechanics,day&night cycle, and power up mechanics.

### Audio Transcriber:

Developed a audio to text transcriber using Whisper's models to transcribe audio. The transcriber utilized methods such as concurrency,lazy loading and html caching.

### Others:

Developed several other small projects such as "Never Have I Ever" game, python action-casual game, platformer demo game, e-commerce admin panel, grocery pos, etc.
